ABOUT ME

Passionate Frontend Developer with a strong proficiency in Typescript, Javascript, and React JS, coupled with extensive hands-on experience within the iGaming industry and known for a dedicated approach to creating exceptional user interfaces and engaging user experiences. A reliable team player committed to consistently meeting deadlines and exceeding project expectations. In addition to my expertise in game development, I possess versatile skills in designing, building, and deploying websites.

WORK EXPERIENCE

Frontend Game Developer   **05.2023 - current**
Bally's Interactive OÜ, Estonia

- Developed slot games using Typescript and Pixi.js
- Worked within an agile team, always adjusting and ensuring that the product reflected the client's vision
- Leveraged my knowledge in physics to simulate 3D object dynamics without using heavy physics libraries, significantly improving the game's performance
- Participated in strategic planning, effort estimation

Frontend Web Developer   **11.2022 - 04.2023**
E-Pavement OÜ, Estonia, (contract)

- Built the company's website using React JS
- Created the original UI design, implemented webpage responsiveness, and emailing
- Deployed the website and did the search engine optimization

Frontend Web Developer   **08.2022 - 11.2022**
Khnami Center, Estonia, (contract)

- Built the company's website using React JS
- Created the original UI design, implemented webpage responsiveness, and emailing
- Deployed the website and did the search engine optimization
